Work Placement Training at Al Ain University for High School Students

The College of Engineering at Al Ain University (Abu Dhabi Campus) hosted a work placement-training program in cooperation with the Applied Technology High School for their 12th-grade students, under the supervision of Eng. Huda Alheeh, Eng. Esra Alnashash, Eng. Rima Masri and Eng. Esraa Hijah.

The training program covered different topics related to software engineering, computer engineering, computer science, network and communication engineering, and civil engineering. Students were involved in several hands-on experiments where they performed the experiment and analyzed the data obtained, they also used different programs to design desktop and mobile applications and Excel training.

The work placement program aimed to raise students' awareness of needed scientific competencies in line with the needs of the labor market in the Emirates by arranging training sessions and workshops.

It is worth mentioning that, this training program assures the role and contribution of the College of Engineering in the community engagement and professional training of young students, which will support and facilitate their professional future.
